	<p>Understanding the world economy</p>
<p>Author(s)</p>	<p>Cleaver, Tony</p>
<p>Publisher</p>	<p>London: Routledge</p>
<p>Details</p>	<p>xiv, 289 p.</p>
<p>Copyright</p>	<p>2013</p>
<p>Abstract</p>	<p>Since the last edition was published in 2006, enormous changes have taken place. The world economy has been in upheaval with the biggest financial crash and ensuing recession since the 1930s; with a global re-ordering of economic power relations; with widespread demonstrations by those left behind; with divergent views about where Europe is heading; with a growing scarcity of essential resources; with increasing international terrorism and with increasing concerns of environmental degradation and climate change. To embrace such urgent issues, this text is an almost entirely rewritten version of earlier editions.</p>

<p>Abstract</p>	<p>The 1990s were momentous in the economic history of India as it witnessed a successful transition of the country from a controlled, inward-looking, and slow growing economy to a liberalized and open economy that has now found a place among the fastest growing economies in the world. Economic reforms are aimed at reorientation of the centrally-controlled economy to a market-oriented one in order to foster greater efficiency and growth. This is being done by introducing greater competition in the economy through progressive internal deregulation accompanied by external competition promoted by foreign direct investment and trade</p>

	liberalization. After the reforms, the Indian economy has been growing faster than its historical growth rate. However, those who are socio-economically disadvantaged have yet to benefit from economic reforms. Hence, inclusive growth - which is the focus of this book - remains the cornerstone of India's development efforts. Inclusive growth necessarily implies a concerted effort by all levels of government to invest in the delivery of public services, particularly those which promote progress in social sectors like health and education.

	Discovering history in China: American historical writing on the recent Chinese past
Author(s)	Cohen, Paul A.
Publisher	New York: Columbia University Press
Details	lxxv, 245 p.
Copyright	2010
Abstract	Since its first publication, Paul A. Cohen's "Discovering History in China" has occupied a singular place in American China scholarship. Translated into three East Asian languages, the volume has become essential to the study of China from the early nineteenth century to today. Cohen critiques the work of leading

	<p>postwar scholars and is especially adamant about not reading China through the lens of Western history. To this end, he uncovers the strong ethnocentric bias pervading the three major conceptual frameworks of American scholarship of the 1950s and 1960s: the impact-response, modernization, and imperialism approaches. In place of these, Cohen favors a "China-centered" approach in which historians strive to understand Chinese history on its own terms, paying close attention to Chinese historical trajectories and Chinese perceptions of their problems, rather than through a set of expectations derived from Western history. In an important new introduction, Cohen reflects on his fifty-year career as a historian of China and discusses major recent trends in the field. Although some of these developments challenge a narrowly conceived China-centered approach, insofar as they enable more balanced comparisons between China and the West and recast the Chinese and their history in more human, less exotic terms, they powerfully affirm the central thrust of Cohen's celebrated work.</p>

His body would be there but he would be somewhere in search of some unheard, untold tale of some other land. And a new dance would be born out of that moving stillness and the Saptaswaras themselves would compose a new song for him. For hours he used to dance and for hours he would be sitting motionless, but his soul would be dancing.

Abstract	American Multicultural Studies: Diversity of Race, Ethnicity, Gender and Sexuality provides an interdisciplinary view of multicultural studies in the United States, addressing a wide range of topics that continue to define and shape this area of study. Through this collection of essays Sherrow Pinder responds to the need to open up a rich avenue for addressing current and continuing issues of race, gender, ethnicity, sexuality, cultural diversity, and education in their varied forms. Substantial thematic overlaps are found between sections and essays, all of which are oriented toward a single broad objective: to develop new and different ways of addressing how multicultural issues, in their discursive sociocultural contexts, are inextricably linked to the operations of power. Power, as a site of resistance to which it invariably gives rise, is tacked from a perspective that attends to the complexities of America's history and politics.

<p>Abstract</p>	<p>This book has grown out of the author's involvement in the teaching of social geography over the last two decades. It makes an approach towards a social geographical interpretation of India. The critical elements of the complex social phenomena that defined India today or at any other point of time in our long history have received detailed attention in this work. Focusing on elements of social identity, such as ethnicity, tribe, caste, language and religion, the work evaluates these parameters of Indian identity in a spatial frame. Admittedly, not much work has been done on the spatial organization of Indian society and its social structure as expressed in identities such as ethnicity, tribe, caste, community, language, dialect and religion at the grassroots level, although broad all India outlines are discernible in stray research. The present work seems to serve two main purposes: First, it reconstructs the broader outlines at the all-India level, disaggregating the data wherever possible up to the regional levels.</p>

Abstract	<p>Trafficking of human beings, especially of women and children, is one of the fastest growing lucrative trades. Trafficking of women for commercial sexual exploitation is a matter of concern as it violates human rights and is a serious blot on humanity. The reasons for the increase in trafficking of women and children are multiple and complex, affecting rich and poor countries alike and India is no exception to this. The points of origin are often the more deprived and backward places, regions or countries, and the points of destination are often urban agglomerates within or across borders. The international and national agencies, governments and other stakeholders are equally conscious for prevention and combating such social problem, while serious efforts are being taken for rescue, rehabilitation of victims and their repatriation in family and society.</p>
