VSL DATABASE GUIDE

CMIE – Capex dx

Registration Based

Introduction

Capex dx provides information and insights on the new capacities coming up in India in the near or medium-term future. The database will help financial markets look for funding opportunities, construction companies and capital goods providers for business opportunities, policymakers for possible new employment potential or infrastructure gaps, and analysts for future industry structure and competition. The database contains information on over 60,000 such projects. Of these over 35,000 have been completed, a little over 5,000 were abandoned and the remaining exceeding 13,000 are currently under various stages of implementation.

CapEx$_{dx}$

Database of the Life Cycle of New Investments
CapEx Data eXtraction for Academia.

CMIE

CapEx$_{dx}$ is specially designed for academia

CapEx is a database of the progress in implementation of new capacity building projects in India.

This unique database tracks projects from their announcement through their implementation and final closure. The closure could be completion or the abandonment of the projects. CapEx tracks the complete life cycle of projects.

The CapEx database contains the history of implementation of projects since 1995. Over 50,000 projects have been tracked. Many of these have been completed and many others are still in their implementation stages.

Projects include those for infrastructure, manufacturing or even services. These could be implemented by government, private sector companies or foreign companies.

CapEx$_{dx}$ is a service that enables researchers to extract all data of selected projects into simple text files. For each selection, the service delivers six separate files that contain all the data for the selected projects.

Select the Vintage (Year)

1. Requests for data extraction are taken up in sequence for processing in intervals of 2 minutes.

2. Processed requests will remain available for download for a maximum of 10 days.

3. Output is one zip file containing the following files:

   1. Project_Detail.txt
   2. Project_Location.txt
   3. Products_and_Capacity.txt
   4. Project_Events.txt
   5. Project_Completion_Details.txt
   6. Project_Cost.txt
   7. Project_Associates.txt

4. First line in each file contains coulmn headers.

5. Each line (row) after the first contains the data for projects as follows [click here].

6. * This is a sample. It provides all the data available in the CapEx database for all cement projects. This is only for the purpose of a demonstration.
