VSL DATABASE GUIDE

BoardEx - North America WRDS

Registration Based

Introduction

The Boardex analyzes over 26,000 companies and maintains the current profiles of over 1.6 million individuals across the world. It includes time series data on compensation, committee structures, board composition from 1999, board announcements from 2002 to the present, and an organization summary and company details. The data also covers the director profiles of all board and supervisory directors in the selected region. These profiles hold details of current and past appointments and activities in both the public and private sectors, going back as far as possible. The networks which evolve throughout a director's career are also included in the data sets.
