

INSIGHT

a complete database

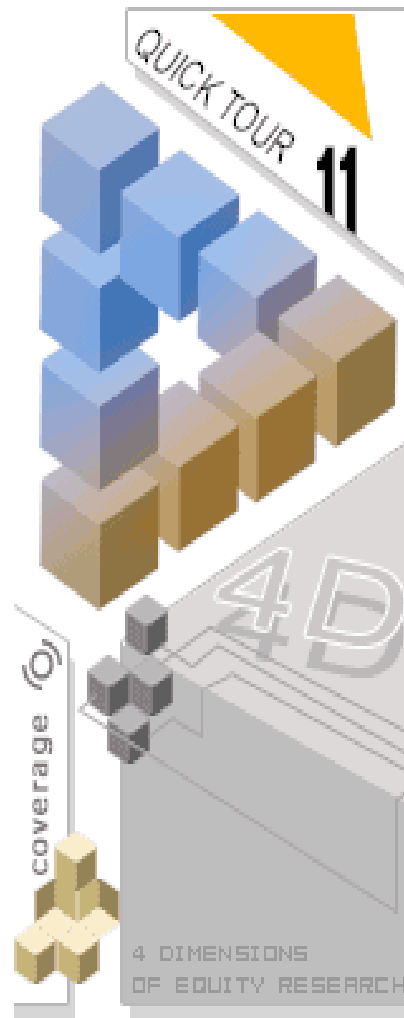

4 Dimensions of INSIGHT

LENGTH

- ❖ Financial information available from 1988 to till date

DEPTH

- ❖ The user can select, query and output [discover] for the historical span and across the entire breadth of companies

BREADTH

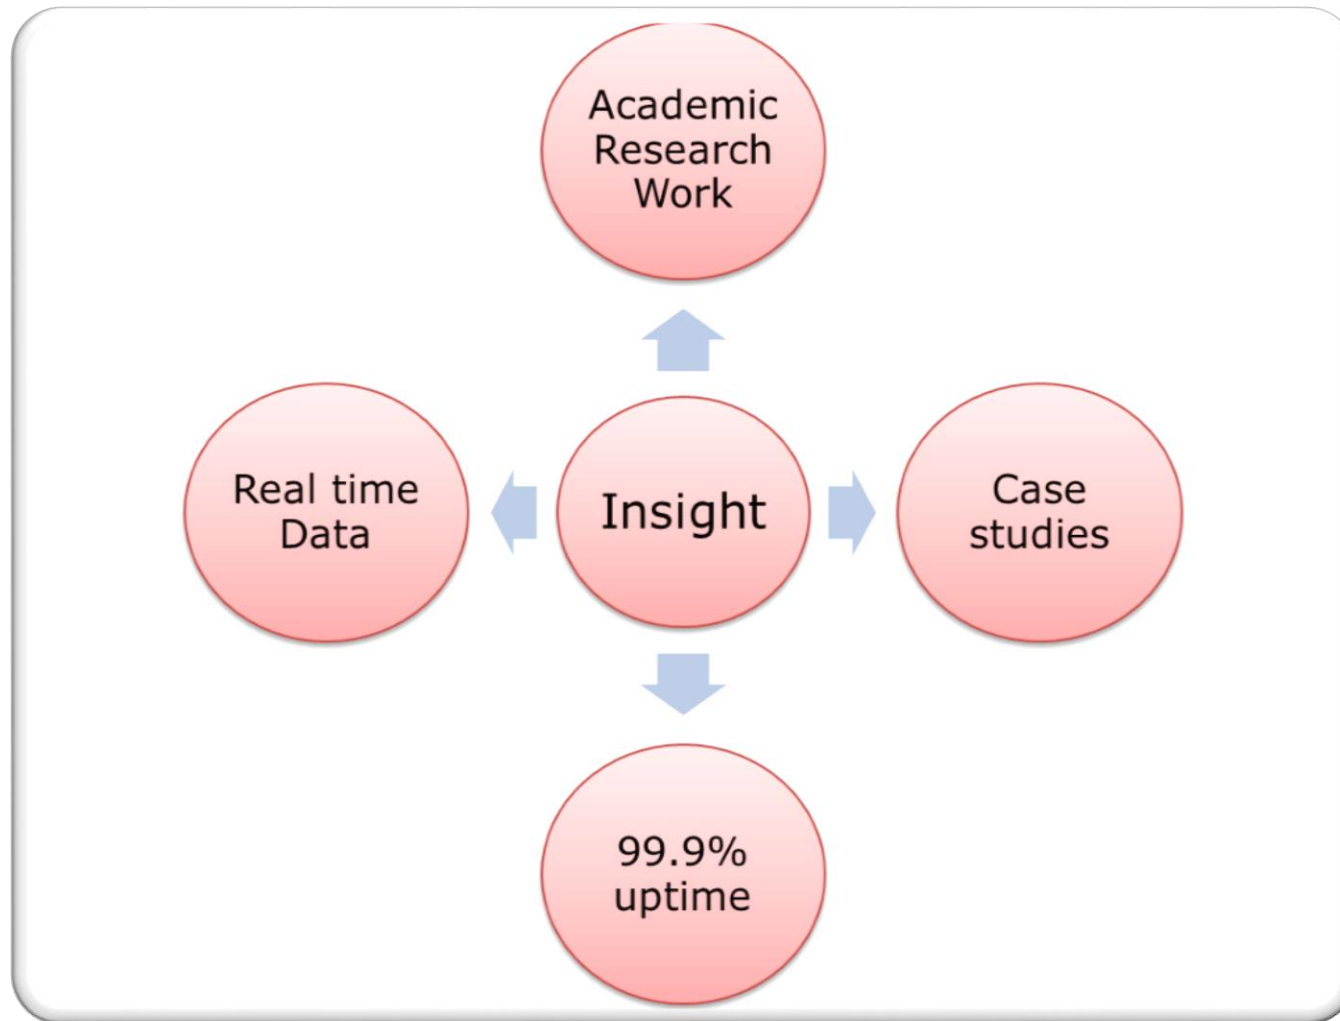

- ❖ Houses information on 5000+ listed, PSUs and news articles that extend beyond one million, archived over the last 14 years

TIME

- ❖ Feed updation (minute by minute)

Key Benefits

Content

Screeners

1. Facilitating hi-speed querying in the Insight database through a highly user-friendly interface.
2. Ability to filter and get historical financial data
3. Screen on mutual fund data
4. Ability to create user-defined formula and apply filters on user formula
5. Filter on conditional formula
6. Example: $\text{EPS Growth Q4} > \text{EPS Growth Q3} > \text{EPS growth Q2}$
7. Ability to screen on Market data
8. Stock Prices
9. Volumes
10. Average volumes
11. Moving Averages (like 50 Days, 100 days, 200 Days)
12. Screen on macro-economic data

Analytics

1. Generate Analytical/Valuation Models .
2. There will be standard default reports , as well as user-defined analytical criteria and template to generate custom reports.
3. User generated reports can be saved and generated on a click/ batch.
4. Examples of user-defined criteria:
5. Stocks crosses their 52-week high in the past 1 week
6. Display Stock Info, Earnings and Recent Corporate announcements
7. List of stocks where FII holdings has gone up
8. Mutual funding holding has increased over past 6 months.

SMART SEARCH

All Catalogs	▼	Key Word		Modified in:	1 Week	▼	Sort by :	Date	▼	Des	▼	Search	Tips
--------------	---	----------	--	--------------	--------	---	-----------	------	---	-----	---	------------------------	----------------------

Search Tips

Use this search page to search all catalogs [categories] on this site.

To use this search page, you can look for a single word. Or, use the tips below to refine your search to find more specific results.

Look for a phrase.

Example - type **computer sales** to find the exact phrase *computer sales*. Since the search is not case-sensitive, this is equivalent to *Computer Sales*.

Look for two or more words at once by using the AND operator.

Example - type **Infosys AND export** to find documents that have both the word *Infosys* and the word *export* anywhere.

Look for words that are close to each other by using the NEAR operator instead of the AND operator. When you use NEAR, the closer together the words are, the higher the rank of the page, so the higher it appears in the list of search results.

Example - type **Reliance NEAR dividend** to match documents where the word *Reliance* is within 50 words of the word *dividend*.

Look for synonyms or similar words by using the OR operator. Note that if you don't use the OR operator and search using multiple words, the words are treated as a phrase.

Example - type **computer OR software** to find the word *computer* or the word *software*, but not necessarily both.

Limit your search by using the AND NOT operator to exclude words.

Example - type **computer AND NOT hardware** to find all instances of *computer*, as long as *computer* is not followed by *hardware*.

Use double quotes if you want to use AND, OR, NOT, or NEAR literally.

Example - type **"Hardware and Software "** to find documents with the phrase *hardware and software*. Without the double quotes, this query would use the AND operator instead of the phrase.

Use a single asterisk (*) to look for words that begin with the same letters.

Example - type **key*** to find *key*, *keying*, *keyhole*, *keyboard*, and so on.

Use a double asterisk (**) to look for all forms of a word.

Example - type **fly**** to match *fly*, *flew*, *flown*, and *flying*.
