Sage Research Methods Online
Sage Research Methods (SRM) is an online collection of books, journals, videos, datasets, methods and reference materials that provide authoritative information on how to perform hundreds of research methods, particularly in the social sciences.

It provides material to guide users through every step of the research process.

SRM is useful to new researchers that are still navigating research methods or choosing the research method that is most applicable to their research question.

But it can also be used by anyone needing to keep up-to-date on the new uses of specific methods or changing research practices.
Search Results falls in different category i.e. Keyword
1. Showing search results for given keyword i.e. Visual anthropology.
2. Shows No. of search results.
3. Result per page.
4. Search by relevance, title, original publication date.
5. Modify your search.
6. Export citations or add to my reading lists.
7. Save document or change the document text size.
8. Show all results or accessible/available to me.
9. Shows by method or keyword.
1. You can cite the articles, chapters from here.
2. Create or See your lists.
3. Share the information on social sites. i.e. Tweeter/Facebook
4. Change the document text size.
5. See the book chapters/Methods map or related contents.
6. Showing the page number of chapters/pages.
7. Find/search any thing in the chapters.
9. You can download the book in PDF.
10. Sections/Chapters of Book
Add to Reading List

Search Reading Lists by name, method or keywords

Browse All Reading Lists

Browse by Method/Discipline

Finding reading lists of key research methods and statistics resources created by users. Browse all reading lists or browse by the options below.

Looking for your private reading lists? Find these in your profile area.
You can see the reading list created by other user on different method and Discipline. By creating your login you can Add the title to My lists. Name of creator with last updated date.
Project planner describes about the research stages. Step by step guide and details about the philosophy of research, research topic, literature review, developing a researchable question, research design, planning and practicalities, research ethics, data collection, data analysis and interpretation, writing up and dissemination. It also explore more about the research related information.
Technologies of Realism? Ethnographic Uses of Photography and Film
In: Handbook of Ethnography

By: MIKE BALL & GREG SMITH

Published: 2001

DOI: http://dx.doi.org/10.4135/9781846068337.n21

Methods: Photographs, Fieldwork, Ethnography, Visual research

**Little Green Books:**
Little Green Books, SAGE's popular Quantitative Applications in the Social Sciences series, provides short and accessible texts on all kinds of quantitative methods. Providing clear statistical explanations, straightforward empirical examples, and ready-to-use procedures these supplementary texts are appropriate for the individual researcher, and any graduate-level, intermediate, or advanced statistics course across the spectrum of academic disciplines. Want to learn about Analysis of Variance? We have a Little Green Book for that! Our brief volumes address a spectrum of advanced quantitative topics including Regression, Models, Data Analysis, Experimental Design, Measurement, Survey Data, and more.

**Applied Regression: An Introduction**
Colin Lewis-Beck, Michael Lewis-Beck
Published: 2010 | Second Edition
Known for its readability and clarity, this Second Edition of the bestselling Applied Regression provides an accessible introduction to regression analysis for social scientists and other professionals who want to...

Methods: Independent variables
